MONTH IN REVIEW
May 1993

Civilian Labor Force

New York State's unemployment rate rose sharply in May 1993, climbing 0.6 of a percentage point from April 1993 to 7.6 percent. The higher unemployment rate reflected a large increase in the number of unemployed outside of New York City. New York City's jobless rate, at 9.5 percent in May, was down 0.3 of a percentage point over the month as unemployment dropped 4,000. Since May 1992, the State's jobless rate has declined half a percentage point.

The unemployment rate in the nation declined slightly in May, falling to 6.7 percent from 6.8 percent in April. The current rate also compare favorably from a year ago when the national rate totaled 7.2 percent. May 1993 marks the fourth consecutive month that the national rate has declined.

Total unemployment in the State moved upward by 47,000 over the month to 646,000 in May. This was the largest increase in joblessness for the month of May since 1988 and the third largest April-May gain since the current labor force series began in 1970. Compared with a year ago, the level of joblessness in May 1993 was lower by 46,000.

Nonfarm Employment

Nonagricultural wage and salary employment (which excludes agricultural workers, the self-employed, unpaid family workers and domestic workers in private households) was up seasonably by 70,200 or 0.9 percent from April 1993 to 7,740,700 in May. The over-the-month upturn compared favorably with an average April-May gain of 67,700 over the previous 10 years. With the exception of 1990 (+95,400), the current job gain was the largest increase for this time of year since 1985.

All industry divisions shared in the April-to-May nonfarm employment expansion with job advances in the trade (+27,200), construction (+15,100), and services (+14,100) divisions accounting for 80 percent of the upturn. Pre-summer hiring by eating places comprised half of the increase in trade employment. Construction employment experienced its strongest May job gain in three years. In services, seasonal recruitment by recreation and amusement facilities, and lodging places was responsible for much of the employment rise.

Lesser job gains were recorded by the remaining industry divisions. Government employment rose 4,300 between April and May with all of the increase in the local segment. The number of jobs in the transportation and public utilities group moved upward by 4,200 as bus companies, truckers/warehousers, and air transport companies added workers. The finance, insurance and real estate group added 3,200 workers to its pay rosters with hiring by realtors and security brokers responsible for the bulk of the expansion. Manufacturing employment experienced a moderate increase of 1,700 as nondurable goods hires were partially offset by durable goods cutbacks. The textile, apparel and food industries provided the bulk of the gain in the nondurable goods job level. Durable goods jobs were down for the first April-May loss since 1989. Cutbacks by electrical and nonelectrical machinery employers were responsible for most of the decline in durable goods employment.

Compared with a year ago, nonfarm employment in May 1993 was lower by 35,600 or 0.5 percent. Since May 1992, employment has declined in manufacturing (-37,700), wholesale and retail trade (-15,200), construction (-7,100), transportation and public utilities (-7,100), finance, insurance and real estate (-6,800) and government (-1,900). Services employment was up 40,100 over the year.

EXPLANATION OF DATA

EMPLOYED AND UNEMPLOYED

Employed and Unemployed. Employment and unemployment estimates prepared by the New York State Department of Labor are developed under a cooperative federal-state program administered by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. The Current Population Survey (CPS)--the official survey instrument for measuring labor force attachment in the United States--is a monthly survey of about 54,000 households conducted throughout the nation by trained interviewers. Employment and unemployment data for New York State and New York City are based directly on responses of households within the state and city which are represented in the CPS sample.

The size of the CPS sample is not sufficient to provide reliable estimates for labor areas in the "balance of state" (state less New York City). In these areas, a series of factors are applied to administrative statistics from state unemployment insurance (UI) operations and to payroll statistics from establishment surveys to provide data on resident employment and unemployment. Data for these labor areas are adjusted so they add to "balance of state" totals.

These revised procedures, which were put into effect in January 1978, are designed to make the estimates more comparable from state to state and to incorporate more current data in the estimating process.

Employed. Employed persons are all those who during the week including the 12th of the month, (a) did any work at all as paid employees or in their own business or profession, or farm or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family, or (b) did not work but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management dispute, or personal reasons, whether or not they were paid by their employers for the time off, and whether or not they were seeking other jobs. Each employed person is counted only once.

Unemployed. Unemployed persons are all those persons who did not work during the week including the 12th of the month, who made specific efforts to find a job within the past four weeks, and who were available for work during the week except for temporary illness. Also included as unemployed are those who did not work at all, were available for work, and (a) were waiting to be called back to a job from which they had been laid off, or (b) were waiting to report to a new wage or salary job within 30 days.

Civilian Labor Force. The civilian labor force comprises all civilians classified as employed or unemployed in accordance with the criteria described above. The civilian labor force participation rate is the ratio of the civilian labor force to the civilian noninstitutional population.

Rate of Unemployment. The rate is the total number of unemployed persons expressed as a percentage of the employed and unemployed, i.e., as a percentage of the civilian labor force.

Not in the Labor Force. Not in the labor force includes all persons 16 years of age or older who are not classified as employed or unemployed.

NONAGRICULTURAL EMPLOYMENT, HOURS AND EARNINGS

Benchmark. Represents a comprehensive count of employment for the various nonagricultural industries as of the first quarter of each year. The primary source of benchmark information is employment data received from establishments covered by the New York State Unemployment Insurance Law. Benchmark data for the remainder are obtained from the records of other private and governmental agencies. Employment estimates for the latest benchmark year and for the previous year are

normally subject to revision annually. Current estimates are based on the March 1992 benchmark level for each industry.

Hours and earnings data are analyzed each year to maintain continuity of series.

Nonagricultural Establishments. All employing units except commercial and noncommercial farms, international government and private households.

Nonfarm Employment. Estimates include all nonfarm wage and salary workers who received pay for any part of the pay period including the 12th of the month. Persons on paid sick leave, paid holiday or paid vacation are included, but those on leave without pay for the entire payroll period are excluded. Persons on the payroll of more than one establishment during the period are counted each time reported. Self-employed persons, unpaid family workers, and domestics are excluded.

Reference Week of the Month. Employment, payrolls, hours, and earnings data are based on reports from firms covering a pay period, usually the week, including the 12th of the month.

Historical Continuity. Historical continuity of statistics of average hours and earnings of manufacturing production workers has been interrupted for a number of industry groups because of changes in the composition of reporting samples or changes in the relative weight of individual industries in group totals. The starting month of a revised series is identified in a footnote in the issue in which the revision is introduced. Some series have been discontinued pending improvement in the reporting samples.

Production-Worker Averages. Average hours and earnings data are derived from reports of payrolls and hours for production and related workers in manufacturing and mining, construction workers in construction, and nonsupervisory employees in private service-producing industries.

Production and related workers include working supervisors and all nonsupervisory workers (including group leaders and trainees) engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping, trucking, hauling, maintenance, repair, janitorial, guard services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with the above production operations.

Construction workers include the following employees in the construction division: Working supervisors, qualified craft workers, mechanics, apprentices, helpers, laborers, etc., engaged in new work, alterations, demolition, repair, maintenance, etc., whether working at the site of construction or working in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonsupervisory employees include employees (not above the working supervisory level) such as office and clerical workers, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social workers, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant workers, custodial workers, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.

--**Average Weekly Hours.** Represents total number of hours worked (including overtime) or paid for (including paid holiday, vacation, and sick leave hours) during week divided by number of employees. The averages are affected by amount of labor turnover during week, changes in amount of overtime hours, and by changes in ratio of full-time or part-time employment.

--**Average Hourly Earnings.** Represents payrolls divided by total number of hours worked or paid for (including paid holiday, vacation, sick leave hours) during period reported. Total payroll includes both straight-time and premium pay. The averages are influenced by the amount of premium pay, as well as by changes in composition of labor force, changes in wage rates, upgrading of employees, etc., and consequently should not be interpreted as wage rates.

--**Average Weekly Earnings.** Derived by multiplying average weekly hours by average hourly earnings. Includes premium wages for overtime and night shift work and payments made on piecework or incentive basis. The averages are affected by changes in length of workweek, part-time work, stoppages for varying causes, labor turnover, and absenteeism.

--**Average Weekly Overtime Hours.** Represents total number of overtime hours worked by production workers during the week divided by total number of production workers. Overtime hours include those for which premiums were paid because those hours were in excess of the number of hours of either the straight-time workday or the workweek. Hours worked on Saturday, Sunday or holidays are included only if premium wage rates were paid.

METROPOLITAN STATISTICAL AREA

A metropolitan statistical area (MSA) is defined according to a set of detailed standards prepared by the Federal Committee on MSAs. Under these standards, which were revised in 1980, areas are designated as an MSA in one of two ways: If there is a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000. In New York State, MSAs are defined in terms of entire counties. In addition to the county containing the main city, an MSA also includes additional counties having strong economic and social ties to the central county.

Most MSA definitions are not subject to change until after the next national census. However, supplemental announcements of a few new MSAs may be issued in the spring of each year, generally because additional cities have reached the 50,000 level according to official population estimates.

If an area has more than 1 million population and meets certain other specified requirements, it will now be termed a Consolidated Metropolitan Statistical Area (CMSA), consisting of major components recognized as Primary Metropolitan Statistical Areas (PMSAs).

A number of areas in the state do not meet the criteria for recognition as an MSA but estimates are published for them. These areas are called Labor Market Areas (LMAs).

The geographic composition of the areas is given below.

Albany-Schenectady-Troy MSA. Albany, Montgomery, Greene, Rensselaer, Saratoga and Schenectady counties.
Binghamton MSA. Broome and Tioga counties.
Buffalo-Niagara Falls CMSA. Erie and Niagara counties.
Buffalo PMSA. Erie County.
Elmira MSA. Chemung County.
Glens Falls MSA. Warren and Washington counties.
Nassau-Suffolk PMSA. Nassau and Suffolk counties.
New York City. Bronx, Kings, New York, Queens and Richmond counties.
New York Combined Area. Bronx, Kings, Nassau, New York, Queens, Richmond, Putnam, Rockland, Suffolk and Westchester counties.
New York PMSA. New York City and Putnam, Rockland and Westchester counties.
Niagara Falls PMSA. Niagara County.
Orange County PMSA. Orange County.
Poughkeepsie MSA. Dutchess County.
Putnam LMA. Putnam County.
Rochester MSA. Livingston, Monroe, Ontario, Orleans and Wayne Counties.
Rockland LMA. Rockland County.
Syracuse MSA. Madison, Onondaga and Oswego counties.
Utica-Rome MSA. Herkimer and Oneida counties.
Westchester LMA. Westchester County.

INDUSTRIAL CLASSIFICATION

Data are classified in accordance with the 1987 edition of the *Standard Industrial Classification (SIC) Manual* prepared by the U.S. Office of Management and Budget. For space requirements on the statistical tables, the formal SIC title for most of the industry groups have been replaced by the short SIC title as contained in Appendix B of the 1987 edition of the *SIC Manual-List of short SIC titles*. SIC titles used for groupings of two or more two-digit manufacturing industries reflect, to the extent possible, the respective components.

MISCELLANEOUS EXPLANATIONS

Effect of rounding. Detail figures may not add to total because of rounding.

Revisions. Revised figures are preceded by an "r" when first published.

KEY

Blank or-	Series not available due to inadequate sample size or other technical reasons.
n.a.	Data not available at date of publication.
n.c.	Not comparable with current data due to a break in series.
d	Figures withheld to avoid disclosure of data of individual reporting units.
*	Less than 0.05 percent.
r	Revised.

OTHER RECURRENT REPORTS

1. **Employment in New York State (formerly Employment Trends).** Monthly for New York State. This newsletter provides an up-to-date summary of labor research issues and trends in New York State and selected regions. Current unemployment rates and area conditions are also reviewed.

2. **Labor Area Summary.** Monthly Statistical Report. This statistical report for all labor areas in the state shows nonagricultural wage and salary employment for the local area and civilian labor force data for the state, major labor areas and all counties.

3. **Unemployment Insurance Tax Rates.** Annual. Rates by industry and size of firm and effects of factors that entered into determination of rates.

4. **Collective Bargaining Settlements in New York State.** Quarterly. Summarizes changes in collective bargaining agreements covering wages that affect 250 or more workers. Covers wages and fringe benefits for agreements that affect 1,000 or more workers. Annual subscription $60. Individual issues $15 each.

5. **Calendar of Collective Bargaining, New York State.** Annual. This report lists all agreements covering 500 or more workers known to the Division of Research that expire or are subject to a wage reopening in the coming year. The report is organized by month of expiration or reopening and, within each month, by industry.

6. **Comparison of Key Unemployment Insurance Statistics (State by State).** Semiannual. Graphically compares New York State's unemployment insurance (UI) program with those of other states. Charts use key statistics such as average unemployment contributions per covered employer, average weekly benefit amounts and average weekly wage of UI covered employment.

7. **Tomorrow's Jobs - Tomorrow's Workers**. Annual. Provides information on economic conditions and the occupational supply and demand situation by geographic region. The reports are designed to assist human resource planners, educators and training providers to help identify training needs in each region. They include a list of demand occupations focusing on specific characteristics of occupations with reasonable hiring expectations (See page viii for map of regions).

8. **Occupational Outlook, 1991-1996.** Projects the demand for workers in various jobs in New York and its geographic regions. The report is based on occupational employment statistics surveys which examine occupational distributions on a three-year cycle. The surveys involve a statistical sample of industries throughout the state to obtain their occupational staffing patterns (See page viii for map of regions).

SPECIAL REPORTS

Special Reports 12, 13, 15 and/or 16 may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Publications Unit.

9. **Occupational Briefs.** Supply career information for specific occupations. These booklets describe job duties, earnings, training requirements, employment outlook, locations of jobs, physical demands and working conditions, etc. Available for Secretary and Career Counselor.

10. **Occupational Guides.** Similar to Occupational Briefs. Guides have been developed for 128 occupations. Designed to provide the user with a better understanding of various occupations in a quick-read format and to assist those who may be making career choices or changes.

11. **Affirmative Action Data - 1990 Census.** This booklet provides data from the 1990 Census for New York State by standard metropolitan statistical area (SMSAs) and counties for use in preparing or assessing affirmative actions plans. Tables show total, female and minority counts and percentages of population, civilian labor force measures and occupational groups. February 1993.

New

12. **The Jobseeker.** An 84-page guide designed primarily to assist young people entering the job market. Contains sections on the job market and labor force, kinds of employers, kinds of occupations, how to choose an occupation, chances of finding a job, what to do to find a job, how to prepare a resume, how to complete an employment application, how to do well at a job interview. Also contains occupational profiles on 152 occupations of interest to youth, with information on each regarding: number of employed, where found, job outlook, education needed, personal characteristics, and earnings. (First copy is free. Additional copies are available at $1.00 per copy.) October 1989.

13. **Occupations Licensed or Certified by New York State.** This publication contains licensing requirements for 65 occupations (training, tests and fees) as well as information on employment outlook, earnings, and working conditions for these occupations. The report also includes a list of apprenticeable occupations. March 1990. Price $10.00.

14. **Directory of Labor Market Information.** Includes brief descriptions of recurring New York State Labor Department publications and data series that refer directly to the labor market as well as a guide to other sources of labor market information. Lists local labor market analysts to contact for additional information . 52 pages.

15. **Labor Force 2000.** Contains civilian labor force projections for New York State and its economic development regions for the year 2000. Includes conservative, moderate and expansive scenarios for New York State. This report was chosen for the 1990 Notable Documents Award by the Government Documents Roundtable of the New York State Library Association. (First copy is free. Additional copies are available at $5.00 per copy.) June 1990.

16. **The Industry Finder.** Designed to assist individuals who have selected an occupation of interest to find the industries in which the occupation is concentrated. The report will often lead to industries that would not have been obvious choices in selecting potential employers or job opportunities. There are 68 pages of industries showing the number employed and the percent of total employment in each industry for 250 selected occupations. November 1990. Price $5.00.

B-PUBLICATIONS

244. A History of Unemployment Insurance Legislation in the United States and New York State, 1935-1989. A report on the background of the unemployment insurance system and changes in federal and state legislation from 1935 to 1989.

SPECIAL BULLETINS

Special Bulletins may be obtained by sending a check or money order, payable to the New York State Department of Labor, to the Office of Communications, New York State Department of Labor, W. Averell Harriman State Office Building Campus,Albany, New York 12240.

254. Directory of Labor Unions and Employee Organizations in New York State, 1992. This edition lists names and addresses of principal or executive officers of over 5,000 local, state and national or international employee organizations representing workers in New York State. Both public employee and private industry unions are included in the directory. Price $15.00.

LABOR RESEARCH REPORTS

92-1. Unemployment Insurance Beneficiaries in New York State, Benefit Year Ending in 1989. Describes personal characteristics, work background, and benefit experience of unemployed workers who drew benefits in 1989.

92-2. A study of the Farm Labor Contractor System in New York State, July 1992. A brief overview of the state's farm labor contractor system and its role in recruiting agricultural workers. Also included is a survey of public perceptions and attitudes, as well as suggested legislative or administrative changes which would enhance the system.

92-3. Occupational Injuries and Illnesses Survey, State and Local Government, New York State, 1991. An annual survey by the Labor Department of work-related fatalities, injuries and illnesses in the public sector. The survey is required by the New York Public Employee Safety and Health Act of 1980.

92-4. New York City Residents Participating in the New York State Apprentice Training Program, Construction Trades, January 1967 - December 1991. An overview of the relative success of the New York State Apprentice Training Program in serving New York City residents who were enrolled as construction trade apprentices. The study includes a 25-year analysis of enrollment and program termination trends by trade, sex and ethnic and age group.
